Healthy Living Solutions Inc.

---

May Offer Maximum Support for:

- **Healthy Kidneys\***
- **Healthy Creatinine Levels\***
- **Healthy Urinary Protein Levels\***
- **Improved Healthy Kidney Function\***
- **Support for Kidney Dysfunction\***
- **Improved Normal Kidney Filtration\***

---

## Description:

**Kidney Restore II** contains important traditional Chinese medicine (TCM) herbal ingredients that work extremely well for supporting healthy kidney function and filtration. Kidney Restore II's natural formula contains No medication or other harmful chemicals that can create serious side effects.\*

Kidney Restore II is simply **a natural dietary supplement** with anti-oxidant, cellular cleansing, body balancing and cellular energy supporting activities. It contains a specific formula and concentration of herbs which have been formulated and successfully applied to **promote healthy kidneys**.\*

In both **Vietnamese** and **traditional Chinese medicine**, the focus of eastern medicine healthcare practitioners is not to treat the symptom for kidney dysfunction such as kidney failure, kidney disease, high creatinine, proteinuria, glomerulosclerosis, nephritis, polycystic kidney disease, IgA nephropathy or nephrotic syndrome.\*

**Instead, eastern medicine practitioners provide healthy lifestyle suggestions** like natural therapies, nutrition, and herbal supplements designed to promote overall kidney balance and body harmony. Traditional Chinese Medicine practitioners believe that the primary goal for those suffering from kidney dysfunction is the restoration of balance, function and equilibrium within the body. Healthy balance and function is crucial to protect the kidneys from damage due to heavy metals, chemicals and other environmental toxins.\*

Using this philosophy, **our exclusive formula was researched and created by both Medical Doctors and Master Herbalists** from Vietnam and Russia and successfully tested in their private practices with their patients. They discovered that every chronic inflammatory disorder of the kidney is a result of abnormalities in renal microcirculation, metabolism, respiration and the anti-oxidative defense system. This discovery led to the successful creation of the current Kidney Restore II formula and has since been used by thousands of satisfied individuals worldwide to promote an improvement in kidney health.\*

**Kidney Restore II contains 7 herbs.** Individually, these herbs offer the body good support for healthy kidneys. Once synergistically formulated in a specific ratio, they can now **offer the body maximum support to maintain healthy kidneys**. \* Please see the second page for additional descriptions of each herb.

---

**Our Non-Traditional Philosophy:** Please note that many of our formulas do not coincide with traditional uses. This is due to the addition of western medicine influences from the inventor's research and clinical practice. That is what makes our products unique. In our formulas, only specific parts of each herb are used (the flower, leaf, stem, or root), which often times can yield totally different results. We have listed traditional uses for the herbs contained in this product. But, we want to stress that these single herb uses, can and in some cases, be very different than the overall balancing effect achieved by our synergistic formula.\*

**Poria:** Poria Cocos Cortex (Fu Ling) is commonly used in Chinese medical herbology as a Qi tonic to eliminate dampness and promote restored organ function. Traditional Chinese medicine practitioners use Poria to strengthen and tonify the spleen to treat edema, internal accumulations of water, loose stools, fatigue, poor appetite, insomnia and a lack of energy. This herb offers support for the kidney, heart and spleen meridian channels. Its properties have been used as a mild diuretic, antibiotic and sedative, and have shown significant immune enhancing ability, similar to the other mushrooms.\*

**Alisma:** Alisma Orientalis (Ze Xie or water plantain rhizome) is found in Europe and the Far East. The root is harvested before the plant comes into flower and is dried for later use. This herbal root has been used in traditional Chinese medicine to enhance kidney and liver yin energy and is particularly helpful in balancing hormones and for edema. Alisma has also been used to lower blood pressure (anti-hypertension), cholesterol and blood sugar levels as well as to regulate water circulation. Alisma supports the kidney and urinary bladder meridian channels.\*

**Rehmannia:** Rehmannia Radix (Di Huang) has been commonly used in traditional Chinese medicine (TCM) formulas due to its ability to tonify kidney and liver yin as well as the spleen, blood, heart and stomach. Other TCM uses of Rehmannia include conditions of bleeding, hypertension, diabetes, anemia, fatigue, weakness, irregular menstruation, and to help regulate blood pressure. Di Huang is considered to be one of the 50 most fundamental herbs used in China.\*

**Morinda:** Morinda Citrifolia (Noni) is a fruit that grows in the tropics in such places as Hawaii and Tahiti. Noni has been used for over 2000 years in Polynesia, China, and India. This fruit was an important source of food for the early Polynesians, who consumed it in times of famine. The seeds, leaves, bark, and roots were also eaten by people versed in the healing properties of this amazing plant. Polynesian cultures used Noni to treat a wide range of ailments including stomach pains, high blood pressure, immune dysfunctions, asthma, dysentery, gum and throat problems, fever, infertility, and diabetes. The increased research of Morinda Citrifolia (Noni) throughout the modern world has yielded very promising results. It has been found that Noni has the potential to promote cellular health, stimulate cell regeneration, boost the immune system as well as promote general health.\*

**Astragalus:** Astragalus membranaceus (Huang Qi) has been extensively tested both chemically and pharmacologically in China, this herb is considered to be one of the 50 fundamental herbs in Chinese herbology. Astragalus has been used in traditional Chinese medicine for its therapeutic actions regarding the immune system, the production of blood, the regulation of water within the body, and to enhance the meridians of the lung and spleen. A large body of clinical studies in China has shown beneficial results for conditions such as: common colds, upper respiratory infections, hepatitis, numbness, nephritis (kidney inflammation), proteinuria, prostatic hypertrophy, psoriasis, nephropathy and influenza.\*

**Cyperus:** Cyperus Rotunda (Xiang Fu) It has tuberous roots or rhizomes that are fragrant and has a slightly bitter taste. Although it is considered one of the world's worst weeds it is used medicinally in both Indian and traditional Chinese medicine for its therapeutic actions of supporting stress and emotional disturbances, irregular menstruation and relieving stomach pain caused by stress. Cyperus is also used in traditional Chinese Medicine to support and balance the liver meridians.\*

**Dioscorea:** Dioscorea oppositifolia (Shan Yao or Chinese Yam Root) is recognized in traditional Chinese medicine as an excellent anti-inflammatory and has been used in Asia for hundreds of years to provide support for the spleen, lungs and kidneys. Practitioners of Chinese herbology use dioscorea for patients with arthritis, asthma, diabetes, eczema, metabolic glucose imbalances, frequent urination, energy deficiencies, and to control fertility. Dioscorea has tuberous roots to 3 feet long that bear small auxiliary tubers. Dioscorea is widely cultivated in Asia for food, grown primarily as an ornamental in the US. \*
